[Besta.domains](#) – Domain Suggestions API – for registrars + hosting providers

Our exciting new technology (proprietary algorithms + sentiment-analysis AI) makes it possible to generate relevant domain names and TLDs. Suggest available domains to **increase sales/conversion.**

besta**.domains** (beta)		examples compare features ☰	
Best available domains:			use our API </>
tigerking	.com ⌄	🔍	Thesaurus ⌄ WIP ⌄

			TLD suggestions:
tigerking.com ⌣	tigerking.movie ♡	tigreking.com ♡	**.com**
pantheraking.com ♡	tigerk.movie ♡	tigerk.stream ♡	**.cat**
besttiger.co ♡	mogul.ly ♡	tigerking.actor ♡	**.movie**
tigerkingcast.com ♡	pantherabaron.com ♡	bigtiger.com $$$	**.actor**
tigerk.actor ♡	tigerk.video ♡	toptiger.co ♡	**.video**
magnate.ly ♡	tigerking.video ♡	supremetigre.com ♡	**.watch**
lionprince.com $$$	bobcatmogul.com ♡	tigerk.watch ♡	**.stream**
monarch.media $$$	hellotiger.co ♡	tigerking.watch ♡	**.life**
jaguarking.com $$$	royaltigre.com ♡	wolfcrown.com $$$	**.tv**
tigerk.cat ♡	monarch.best $	thetigersociety.co ♡	**.media**
tigerking.media ♡	tigermogul.com ♡	leopardmonarch.com ♡	**.film**
liegetiger.com ♡	tigerk.media ♡	monarch.club $$$	**.golf**
welovetigers.co ♡	tigerking.film ♡	liegepanthera.com ♡	**.pet**
			.vet
			.audio
			.best
			.salon

Finds many available ".com" domains:
"**thisisgood.com**" => **thisisdecent.com**, **thisissuperb.com**

Gets context of word, from Bing web search results:
"**tigerking**" => **tigerking movie**, **tigerking cast**

Another example is the recent *Boss Baby* movie:
"**bossbaby**" => **bossbaby.movie**, **bossbaby.show**

However, if you reverse it, it no longer references a movie, but a game which you can find on the Apple app store:
"**babyboss**" => **bossbaby.game**, **bossbaby.games**

* understands obscure terms, not just common words

* understands word hacks and incomplete fragments like:
"politica", "polit", "queerl", "policea", "curtainsrus", "greatist"

* generates brandables like: "panoramio", "wordio", "besta", "worldly", "domainy", "trgr", "dudely", "ranka"

* matches most relevant TLDs. For search "worldly.com", suggests: ".world, .earth, .travel, .international, .city, .eco"

* We use "sentiment-analysis" (linguistics AI) to determine if a synonym is positive/negative. We only suggest positive connotations. No offensive or awkward phrases!

It's not perfect. It's new. Still in beta. A proof of concept...

* But it's already the best! Please try it at https://besta.domains. Please let us know what you think. Please do compare it to your own results, or to DomainsBot, which also provides suggestions. We're still improving, but already provide useful results every time.

* If your visitor wants "bestwebsite.com", and it's not available, they may leave dissappointed, and later try again at a different registrar. Convert your visitor to a repeat customer by suggesting good alternatives.

Next todo:

* Better Natural Language processing. Currently relying on a lot of hacks, like simply replacing a word with its synonym from the same part-of-speech. This is still better than other suggestion tools, but does not always sound natural. We're working on improving our "Markov strings" and other NLP tools to construct human-like phrases.

* More before/after words based on search trends and pop culture terms crawled from internet articles.

* More available ".com" results – more word hacks and creative transformations, more business words prepended/appended, to find more available ".com"s. Currently, DomainsBot finds more available ".com" results than we do for some queries. That won't be the case for long. We will analyze internet search results, articles, writing, current events, memes, wikipedia, to find more before/after words, to prepend/append. We'll add quantity, while maintaining the highest quality.

* Will work with registrars/hosting companies to decide which features to work on, how to improve the results, and what type of infrastructure/server work needs to be done to deliver this data more efficiently.
